

SOLEX 011 PENETRATING OIL

Solex 011 is the penetrating oil formulated to loosen rust-locked nuts, bolts, studs and pipe connections. It has a capillary action that seeps quickly into cracks and pores, dissolves the rust from a solid to a liquid state, without breakage of rust frozen threaded parts which are time consuming for hammering, tapping or drilling.

TECHNICAL SPECIFICATIONS	
Capacity	420 ml
Classification	aerosol
General Appearance	clear liquid
pH value	7
Specific gravity	0.89
Vapor pressure @ 21 ° C	6.5 kgs

AREAS OF APPLICATIONS

Solex 011 is widely used in two applications

1. Penetrate and lubricant applications:
 - a) disassembling of nuts, bolts, studs and pipe fittings,
 - b) freeing of stuck valves and frozen bearings,
 - c) removing of gears and pulleys.

2. Water displacing applications:
 - a) dries wet metal parts in minutes,
 - b) protects tools against rust.

The data published are to our best knowledge the correct information. We reserve the right to alter the specifications any time and without prior notice.
