

## SOLEX 220 SYNTHETIC ENGINE OIL

Solex 220 is a synthetic economy engine oil designed to meet all types of vehicles under extremely cold or extremely hot climatic conditions. It provides active protection against wear and excellent reliability even under the toughest operating conditions.

Solex 220 is completely miscible with all conventional HD engine oils. It provides a lubricating film, which has an excellent load carrying capacity. It transforms the frictional contact-areas of equipment into self-alloying and sub-surface lubricating areas. Solex 220 then penetrates the surface, fills in the natural machine - finish asperities, and forms a self-plating action, which converts the friction movement into a soft and silent glide.

### TECHNICAL SPECIFICATIONS

|                           |             |              |
|---------------------------|-------------|--------------|
| Grade                     |             | SAE 5 W - 50 |
| Appearance                |             | Dark blue    |
| Specific gravity @ 15 ° C | ASTM 1298   | 0.85 g/ml    |
| Viscosity index           | ASTM D 2270 | 168          |
| Viscosity @ 40 ° C        | ASTM D445   | 180 cst      |
| Flash point               | ASTM D 92   | 200 ° C      |

### AREAS OF APPLICATIONS

Solex 220 has variety of uses: for all turbocharged engine normally aspirated diesel engines and four-stroke gasoline engines.
