

SOLEX 440 SUPER TEXTILE OIL

Solex 440 is scientifically manufactured with unique properties to provide a complete lubrication for all moving components in today's textile machinery. It is formulated with light colored, highly refined mineral oil with select additives that impart outstanding protection against wear, rusting and oxidation.

Solex 440 does not stain or mark fabric as it contains selective emulsifiers to allow complete washout, even during the relatively short color washes process. Solex 440 has a good clingability with high speed spindle mechanism. It remains in position despite of irregular and fluctuating speed actions.

TECHNICAL SPECIFICATIONS

Appearance		Light yellow
Specific gravity @ 15 ° C	ASTM D 1298	0.89 g/ml
Viscosity Index	ASTM D 2270	95
Viscosity @ 40 ° C	ASTM D445	19.8 cst
Flash point	ASTM D 92	175 ° C

AREAS OF APPLICATIONS

Solex 440 is recommended for all textile machines. It lubricates textile spindle and thread, spin and spindle rings, notched bars and needle boards on knitting and weaving frames and sewing machines.
