

SOLEX 606 FOOD MACHINERY GREASE

Solex 606 is a food grade grease applicable to food machinery for safe in areas where incidental contact with edible foodstuff may occur. It contains special rust and oxidation inhibitors that prevent machinery deterioration and ensure long-term production.

Solex 606 has an ability to withstand constant heating and cooling cycles without damage its lubricity. It meets the requirements of equipment operating from cooking and processing temperatures to near zero temperatures of coolers and refrigerators.

TECHNICAL SPECIFICATIONS

NLGI grade		2
Viscosity @ 40 ^o C	ASTM D445	350 cst
Penetration unworked worked @ 60 strokes	ASTM D217	265 mm 290 mm
Timken test loads	ASTM D 2509	50 lbs

AREAS OF APPLICATIONS

Solex 606 is applied to : meat and poultry processors, steam bottle washing plant breweries, canners, dairies, veterinary services, hospitals, restaurants and hotels etc.

Uses : conveyors, gears, rollers, chains, grid belts, plungers, sprockets and slides etc.

The data published are to our best knowledge the correct information. We reserve the right to alter the specifications any time and without prior notice.
