

## SOLEX 70 UNIVERSAL PRIMER

Solex 70 is water based, anti-corrosion primer specially designed to protect metal surfaces against rust and corrosion. It is non-toxic, non-flammable and contains no lead or harmful substances. Solex 70 is solventless thereby eliminating the need of mixing expensive thinners than water and can thus be used in confined areas.

Solex 70 is easily applied by brush, spray or roller and equipment is easily cleaned with water. It can be used as a self-priming finish topcoat (at least two coats) or alternatively, greatly improves adhesion when used with compatible enamels or other protective coatings. Solex 70 does not interfere with welding and fabrication.

### TECHNICAL SPECIFICATIONS

Appearance	Red
Flash point	Non-flammable
Specific gravity	1.4 to 1.5
pH value	2 to 3
Total Non-volatile	57% to 59%

### AREAS OF APPLICATIONS

The protection includes of black iron pipes, wrought iron gates, fences, structural steel, vehicles under carriage, tanks and many outdoor applications. Solex 70 may be used on damp surfaces such as inside air-conditioning cooling towers, where other primers, which are based on lighter-than-water resins and oils, will fail to perform.
