

SOLEX 708 LITHIUM SOFT GREASE

Solex 708 is a high quality multipurpose grease manufactured on base of lithium hydroxy-stearic and medium viscosity paraffinic oils. It contains extreme pressure additives incorporated with anti-oxidant, anti-rust and anti-wear additives, which allow them to ensure an efficient lubrication of mechanisms submitted to heavy load or violent shocks.

TECHNICAL SPECIFICATIONS

NLGI grade		0
Dropping point	ASTM D 566	180 ° C
Viscosity @ 40 ^o C	ASTM D445	100 cst
Penetration unworked worked @ 60 strokes	ASTM D217	340 mm 375 mm
Timken test loads	ASTM D 2509	40 lbs

AREAS OF APPLICATIONS

Solex 708 is suitable for most automotive and industrial applications, where recommendation for medium loaded bearings and chassis. In addition, due to its easy pumpability, Solex 708 is suitable in high pressure centralized lubrication systems
